

SmartBOL Enterprise™

SmartBOL Enterprise™ has been designed for higher volume shippers. Enterprise builds on the features of SmartBOL™ Classic products by adding advanced bill of lading features and offers integration with existing ERP or WMS systems such as MAS90/500, Great Plains, JD Edwards, AS400 based systems, etc. Our goal is to provide seamless feature integration without impacting current operations.

Enterprise is a robust and powerful product yet it retains the ease of use common to all SmartBOL™ software. Should you need help or have questions, we offer priority customer support to our Enterprise clients.

SmartBOL Enterprise™ quickly and easily implements many advanced features needed by high volume shippers. Enterprise greatly increases efficiency of shipping operations by eliminating or reducing time and resources consumed by multiple data entry, thereby eliminating costly errors. An investment in Enterprise will quickly save you valuable time and money.

- ❖ VICS Bill of Lading – automatically selects from 3 VICS bill of lading formats with 17 digit bill of lading number.
- ❖ Bill of lading consolidation – creates bill master bill of lading to consolidate shipments or multi-stop shipments.
- ❖ Uses SQL Server or Oracle to maintain bill of lading information. Other applications such as reporting systems can access bill of lading data directly.
- ❖ CSV/XML flat file import - imports bill of lading records from CSV/XML flat files. External processes can create these files to automate the bill of lading process.
- ❖ Remote location WAN Client Support – Supports remote location clients over WAN or VPN. Allows all locations to use centralized database.
- ❖ ODBC bill of lading automation interface* - SmartBOL™ imports order or invoice records from an ODBC source and creates bill of lading on the fly.
- ❖ Electronic Signature Capture and digital storage* – This interface captures signatures electronically and stores bill of lading images in database. Remote users can view these images using SmartBOL™ application.
- ❖ QuickBooks, Peachtree and Simply Accounting interface for bill of lading automation* - SmartBOL™ imports QuickBooks, Peachtree or Simply Accounting order or invoice records and creates bill of lading on the fly.
- ❖ Hazardous material bill of lading* – SmartBOL™ commodity database stores various hazardous shipment related information that makes HazMat bill creation an easy task.
- ❖ User authentication and privilege management – enables user level creations that are assigned specific privileges.
- ❖ Print bill of lading with logo and company information – don't need any customization to print your logo and company information.
- ❖ Save or Email bill of lading as PDF. Email bill of lading from within the application.
- ❖ Print standard and retailer* shipping labels – SmartBOL™ supports several retailer labels. In addition we add custom or unsupported retailer labels.
- ❖ Customization – because of the flexible design of SmartBOL™ we can implement customized features quickly and cost-effectively.

* Optional Feature
